1. GAME OVERVIEW

1.1 High Concept

Triarchy: Houses of Mythos is a mobile gacha RPG where players collect heroes, join guilds called Houses, and form 3-way alliances called Triarchies. Every 3 months, these alliances dissolve and reform, creating ever-shifting server politics and preventing meta stagnation.

Tagline: "The Mobile RPG Where Guilds Form Nations"

Core Innovation: Seasonal guild alliances that reset every 90 days, creating Game of Thrones-style politics in a mobile idle RPG framework.

1.2 Target Audience

Primary:

- Mobile gacha RPG players (Raid: Shadow Legends, AFK Arena, Idle Heroes)
- Age 18-35
- Males (60%), Females (40%)
- Willing to spend \$25-100/month on in-game purchases

Secondary:

- Strategy game players interested in social dynamics
- Casual players who like idle/auto-battle mechanics
- Collectors who enjoy roster-building games

1.3 Market Position

Genre: Gacha RPG + Guild Strategy + Idle/Auto-Battle

Competitors:

- Raid: Shadow Legends (lacks alliance system)
- AFK Arena (lacks political depth)
- Idle Heroes (lacks seasonal resets)
- Hero Wars (lacks meaningful guild content)

Differentiation: Only mobile RPG combining guild alliances with seasonal political cycles.

1.4 Platforms & Monetization

Platforms: iOS, Android (mobile-first)

Business Model: Free-to-play with in-app purchases

Revenue Streams:

- Gacha summons (60%)
- Battle passes (20%)
- Cosmetics (15%)
- Convenience items (5%)

Target Metrics:

- Payer conversion: 3-5%
- ARPPU: \$30-75/month
- D1 retention: 40%+

- D7 retention: 20%+
- D30 retention: 10%+

2. CORE GAMEPLAY LOOP

2.1 Minute-to-Minute Loop

17. 1. Collect Heroes via gacha summons
18. 2. Level Up Heroes through battle experience
19. 3. Equip Items to boost hero stats
20. 4. Battle Enemies in auto-combat
21. 5. Earn Rewards (gold, shards, equipment)
22. 6. Repeat

2.2 Daily Loop

23. 1. Log in for daily rewards
24. 2. Complete daily quests (3-5 tasks)
25. 3. Battle campaign stages (10-20 battles)
26. 4. Summon heroes if shards available
27. 5. Enhance equipment with gold/stones
28. 6. Donate to House for contribution points
29. 7. Chat with House members

2.3 Weekly Loop

30. 1. Territory Wars (Saturday-Sunday)
31. 2. Weekly quests (higher rewards)
32. 3. House rank progression
33. 4. PvP arena battles (when unlocked)
34. 5. Check leaderboards (House, Triarchy, individual)

2.4 Long-Term Loop (3-Month Season)

35. 1. Join a House (or create one)
36. 2. Form Triarchy with 2 other Houses
37. 3. Compete for territories across the season
38. 4. Navigate politics (alliances, betrayals, wars)
39. 5. Season ends at Day 90
40. 6. Collect rewards based on rankings
41. 7. Triarchies dissolve
42. 8. New season begins with fresh alliances

3. HERO SYSTEM

3.1 Hero Overview

Total Heroes Designed: 132

Launch Heroes: 66 (6 per tribe)

Post-Launch: 66 (released as ongoing content)

Progression Mechanics:

- Level: 1-60
- Stars: 1★ to 5★ (promotion via shards)
- Equipment: 4 slots (weapon, armor, 2 accessories)

3.2 Tribes (11 Total)

Heroes belong to one of 11 fantasy tribes:

43. 1. Undead - Death magic, skeletons, liches, vampires
44. 2. Infernal - Demons, hellfire, chaos
45. 3. Angelic - Holy warriors, divine light, healing
46. 4. Gaia - Nature magic, druids, beasts
47. 5. Aquatic - Sea creatures, water magic
48. 6. Futuristic - Sci-fi tech, robots, cybernetics
49. 7. Egyptian - Ancient gods, pyramids, desert magic
50. 8. Norse - Vikings, frost magic, berserkers
51. 9. Draconic - Dragons, dragonborn, fire/ice breath
52. 10. Shadow/Void - Darkness, void magic, assassins
53. 11. Fae - Fairies, tricksters, nature spirits

3.3 Rarity Tiers

Common (18 heroes at launch)

- Base stats: 100 HP, 20 ATK, 10 DEF, 100 SPD
- 2 abilities (1 active, 1 passive)
- Easiest to obtain and promote

Rare (18 heroes at launch)

- Base stats: 120 HP, 24 ATK, 12 DEF, 105 SPD
- 2 abilities (both can be active)
- Moderate difficulty to obtain

Epic (19 heroes at launch)

- Base stats: 150 HP, 30 ATK, 15 DEF, 110 SPD
- 3 abilities (2 active, 1 passive)
- Unique abilities (not shared with other heroes)

Legendary (11 heroes at launch)

- Base stats: 200 HP, 40 ATK, 20 DEF, 120 SPD
- 4 abilities (3 active, 1 passive)
- Completely unique kits
- Hardest to obtain (1% gacha rate)

3.4 Classes (5 Total)

54. 1. Tank - High HP, high DEF, low ATK
55. 2. Warrior - Balanced stats, frontline fighter
56. 3. Mage - High ATK, low DEF, magic damage
57. 4. Support - Healing, buffs, utility
58. 5. Assassin - High SPD, high CRIT, low HP

3.5 Hero Stats

Primary Stats:

- HP (Health Points): Damage before death
- ATK (Attack): Damage output
- DEF (Defense): Physical damage reduction
- SPD (Speed): Turn order, evasion calculation

Secondary Stats:

- CRIT (Critical Rate): % chance for 2× damage (auto-attacks only)
- M.RES (Magic Resistance): % magic damage reduction
- ACC (Accuracy): Hit chance vs evasion
- EVA (Evasion): $\text{SPD} / 10$ (e.g., 100 SPD = 10% evasion)

3.6 Stat Scaling

Level Scaling (1-60):

Level Multiplier = $1 + (\text{current_level} - 1) \times 0.05$

Examples:

Level 1: 1.0× (base stats)

Level 10: 1.45× (45% stronger)

Level 20: 1.95× (95% stronger)

Level 60: 3.95× (295% stronger)

Star Scaling (1★-5★):

Star Multiplier:

1★: 1.0×

2★: 1.2×

3★: 1.5×

4★: 1.9×

5★: 2.4×

Effective Stats Formula:

$\text{Effective_HP} = \text{Base_HP} \times \text{Level_Mult} \times \text{Star_Mult} \times (1 + \text{Equipment_Bonus})$

$\text{Effective_ATK} = \text{Base_ATK} \times \text{Level_Mult} \times \text{Star_Mult} \times (1 + \text{Equipment_Bonus})$

$\text{Effective_DEF} = \text{Base_DEF} \times \text{Level_Mult} \times \text{Star_Mult} \times (1 + \text{Equipment_Bonus})$

$\text{Effective_SPD} = \text{Base_SPD} + (\text{Level_Mult} \times \text{Star_Mult} \times \text{Equipment_Bonus})$

Note: HP, ATK, DEF use multiplicative scaling. SPD uses additive scaling.

3.7 Hero Leveling

Experience Gain:

- Win battle: 50 EXP per hero in team
- Lose battle: 12 EXP per hero in team
- Hard mode: 1.5× EXP
- Nightmare mode: 2.0× EXP

EXP Requirements:

$\text{EXP_to_Next_Level} = 100 \times \text{current_level}$

Examples:

Level 1→2: 100 EXP

Level 10→11: 1,000 EXP

Level 59→60: 5,900 EXP

Total 1→60: 177,000 EXP

Max Level: 60

3.8 Star Promotion

Shard Requirements:

1★ → 2★: 25 shards

2★ → 3★: 50 shards

3★ → 4★: 150 shards

4★ → 5★: 300 shards

Total shards (1★→5★): 525 shards

Shard Acquisition:

- Duplicate hero from gacha: 5/10/15/25 shards (Common/Rare/Epic/Legendary)
- Campaign rewards: 1-3 shards per stage
- Events: Variable
- Shop purchases: Variable

3.9 Archetype System

Heroes have hidden archetype modifiers that affect stat distribution:

Archetype Multipliers:

- Glass Cannon: ATK ×1.2, HP ×0.8
- Bruiser: HP ×1.15, SPD ×0.9
- Speed Demon: SPD ×1.3, DEF ×0.85
- Tank: HP ×1.3, DEF ×1.2, ATK ×0.7
- Balanced: No modifiers (1.0× all stats)

Applied after base stats, before level/star scaling.

4. COMBAT SYSTEM

4.1 Battle Format

Team Size: 5 heroes per team

Battle Type: Turn-based auto-battle with manual ability control

Turn Order: Determined by SPD stat (highest goes first)

Victory Condition: Eliminate all enemy heroes

Defeat Condition: All player heroes eliminated

4.2 Combat Flow

1. Pre-Battle:

- Player selects 5 heroes for team
- Auto-battle enabled by default
- Player can toggle manual ability triggers

2. Battle Start:

- All heroes sorted by SPD (highest to lowest)
- Energy starts at 0 for all heroes
- Turn 1 begins

3. Each Turn:

For each hero in turn order:

1. Passive gain: +10 energy
2. Check status effects (stun, DoT, etc.)
3. Decide action:
 - Auto-battle: Use ability if energy $\geq$ cost, else auto-attack
 - Manual: Player can trigger ability, else auto-attack
4. Execute action
5. Update energy (auto-attack +20, ability -cost)
6. Update cooldowns (-1 turn for all abilities)
7. Check for deaths
8. Check win/loss condition
9. Next hero's turn

4. Battle End:

- Victory/defeat screen
- EXP awarded to all heroes
- Loot distributed (gold, shards, equipment)

4.3 Energy System

Max Energy: 200

Starting Energy: 0

Passive Gain: +10 per turn

Auto-Attack Gain: +20 per auto-attack

Taking Damage: +5 per hit received

Ability Cost: 80-150 (varies by ability)

4.4 Damage Calculation

Auto-Attack Damage (Physical):

$\text{Base_Damage} = \text{Attacker_ATK} - (\text{Defender_DEF} \times 0.5)$

$\text{Base_Damage} = \max(1, \text{Base_Damage})$ # Minimum 1 damage

$\text{Variance} = \text{random}(0.9, 1.1)$ # $\pm 10\%$ random variance

$\text{Crit_Check} = \text{random}(0, 100)$

if $\text{Crit_Check} < \text{Attacker_CRIT}$:

$\text{Crit_Mult} = 2.0$

else:

$\text{Crit_Mult} = 1.0$

$\text{Final_Damage} = \text{floor}(\text{Base_Damage} \times \text{Variance} \times \text{Crit_Mult})$

Ability Damage (Magic):

$\text{Base_Damage} = \text{Caster_ATK} \times \text{Ability_Multiplier}$

$\text{Magic_Reduction} = 1 - (\text{Defender_M.RES} / 100)$

$\text{Final_Damage} = \text{floor}(\text{Base_Damage} \times \text{Magic_Reduction})$

Notes:

- Physical damage reduced by DEF (flat 50% effectiveness)
- Magic damage reduced by M.RES (percentage)
- Abilities do not crit
- Abilities have no random variance

4.5 Hit Chance & Evasion

Hit Chance Formula:

Base_Hit_Chance = 95%

Evasion = Defender_SPD / 10

Final_Hit_Chance = Base_Hit_Chance - Evasion + (Attacker_ACC / 100)

Minimum Hit Chance: 5%

Maximum Hit Chance: 95%

Example:

Attacker ACC: 100%

Defender SPD: 200 (20% evasion)

Final_Hit_Chance = 95% - 20% + 100% = 175%

Capped at 95%

4.6 Status Effects

Stun: Cannot act for X turns

Burn: Take X damage per turn (DoT)

Freeze: SPD reduced by 50%, cannot dodge

Poison: Take % of max HP per turn

Heal Over Time: Restore X HP per turn

Attack Buff: ATK increased by X% for Y turns

Defense Buff: DEF increased by X% for Y turns

Shield: Absorb next X damage

4.7 Abilities

Generic Abilities (Common/Rare heroes share):

- Slash: Deal 150% ATK damage to one enemy
- Fireball: Deal 180% ATK magic damage to one enemy
- Multi-Shot: Deal 100% ATK to 3 random enemies
- Heal: Restore 120% ATK as HP to ally with lowest HP
- Shield Bash: Deal 130% ATK, stun for 1 turn
- etc. (12 total generic abilities)

Epic Abilities (Unique per Epic hero):

- 99 unique abilities designed
- Examples:
 - Death Coil: Deal 200% ATK magic damage, heal self for 50% damage dealt
 - Flame Breath: Deal 150% ATK magic to all enemies, apply burn (50 damage/turn)
 - Divine Light: Heal all allies for 100% ATK, cleanse debuffs

Legendary Abilities (Completely unique):

- Game-changing effects
- Examples:
 - Apocalypse: Deal 300% ATK magic to all enemies, reduce their max HP by 20%
 - Resurrection: Revive fallen ally with 50% HP (once per battle)

4.8 Tribal Synergies

When 3+ heroes from same tribe are on a team:

Undead: +15% ATK, heal 5% max HP per kill

Infernal: +20% CRIT damage, apply burn on crits

Angelic: +10% M.RES, heal 3% max HP per turn

Gaia: +15% HP, +10% healing received

Aquatic: +10% evasion, cleanse 1 debuff per turn

Futuristic: +15% SPD, +10% accuracy

Egyptian: +10% all stats when HP >50%

Norse: +20% DEF, immune to freeze

Draconic: +25% ATK, -10% DEF (berserker)

Shadow: +15% evasion, first hit always crits

Fae: +20% SPD, chance to charm enemy

4.9 Type Advantage

Physical vs Magic Matchup:

- Tanks (high DEF) counter Warriors/Assassins
- Mages (magic damage) counter Tanks
- Assassins (high SPD) counter Mages
- Supports enable all allies

5. EQUIPMENT SYSTEM

5.1 Equipment Overview

Slots per Hero: 4

- Weapon
- Armor
- Accessory 1
- Accessory 2

Rarity Tiers: Common, Rare, Epic, Legendary (matches hero rarities)

Enhancement Levels: +0 to +15

Endgame Power: Equipment provides 30-40% of total hero power at max enhancement.

5.2 Equipment Stats

Primary Stat (Always Present):

- Weapon: +ATK
- Armor: +DEF
- Accessory: +HP or +SPD

Secondary Stats (Random, 1-3 per item):

- +CRIT
- +M.RES
- +ACC
- +EVA

Stat Ranges by Rarity:

Common Weapon:

+ATK: 10-20

Secondary stats: 1 stat, +5-10 value

Rare Weapon:

+ATK: 20-40

Secondary stats: 2 stats, +10-20 value

Epic Weapon:

+ATK: 40-80

Secondary stats: 2-3 stats, +20-40 value

Legendary Weapon:

+ATK: 80-150

Secondary stats: 3 stats, +40-80 value

5.3 Enhancement System

Cost per Level:

Enhancement Level | Gold Cost | Stone Cost

+0 → +1 | 1,000 | 1

+1 → +2 | 2,000 | 2

+2 → +3 | 3,000 | 3

...

+14 → +15 | 15,000 | 15

Total +0 → +15: | 120,000 | 120

Stat Increase per Level:

Each +1 level increases all stats by 5%

Example (Legendary Weapon, +100 ATK base):

+0: 100 ATK

+5: 125 ATK (+25%)

+10: 150 ATK (+50%)

+15: 175 ATK (+75%)

5.4 Set Bonuses

When equipping 2 or 4 items from same set:

Warrior Set (2-piece):

- +10% ATK

Warrior Set (4-piece):

- +20% ATK, +15% CRIT

Tank Set (2-piece):

- +15% HP

Tank Set (4-piece):

- +25% HP, +10% DEF

Mage Set (2-piece):

- +15% M.RES penetration

Mage Set (4-piece):

- +30% magic damage, restore 10 energy on kill

Speed Set (2-piece):

- +10% SPD

Speed Set (4-piece):

- +20% SPD, +10% evasion

Lifesteal Set (2-piece):

- Heal 10% of damage dealt

Lifesteal Set (4-piece):

- Heal 20% of damage dealt, +10% ATK

5.5 Equipment Acquisition

Sources:

- Gacha summons (10-20% chance per pull)

- Campaign battles (random drops)
- Equipment events
- Shop purchases (gold or premium currency)

Drop Rates (Campaign):

Common: 60%

Rare: 30%

Epic: 9%

Legendary: 1%

6. GACHA SYSTEM

6.1 Summoning Overview

Summoning Altar: Main gacha screen

Currency: Summon Shards (earned from battles, quests, purchases)

Cost: 100 shards per single summon, 1,000 shards per 10-pull

6.2 Rarity Distribution

Single Pull Rates:

Common: 70%

Rare: 20%

Epic: 9%

Legendary: 1%

Pity System:

- Every 10 pulls guarantees at least 1 Epic
- Every 100 pulls guarantees 1 Legendary
- Pity counter resets when threshold reached

6.3 Duplicate Heroes

When summoning a hero you already own:

- Hero converts to shards automatically
- Shard amount based on rarity:

- Common: 5 shards

- Rare: 10 shards

- Epic: 15 shards

- Legendary: 25 shards

Auto-Promotion:

- When shard count reaches promotion threshold, hero auto-promotes
- Example: Pull duplicate Legendary (25 shards), total = 25/300 toward 4★ to 5★

6.4 First-Time Summon

New Hero (never owned before):

- Unlocks at 1★, Level 1
- Added to roster
- Celebration animation

Duplicate:

- Shards added to existing hero
- Notification shows shard count/promotion progress

6.5 Gacha Animations

Summoning Sequence:

59. 1. Tap "Summon" button
60. 2. Chest appears and shakes
61. 3. Chest opens with flash of light
62. 4. Hero card flies in from top
63. 5. Rarity reveal (color glow + stars appear)
64. 6. New hero celebration OR duplicate shard notification
65. 7. If promotion triggered: Star-up animation

Rarity Visual Indicators:

- Common: Gray background, 1 star
- Rare: Blue background, 2 stars
- Epic: Purple background, 3 stars, purple glow
- Legendary: Gold background, 5 stars, particle effects, fanfare

6.6 Shop & Purchases

Summon Shard Packs:

- 1,000 shards: \$9.99
- 3,000 shards: \$24.99
- 10,000 shards: \$99.99

Daily Deals:

- Guaranteed Epic hero: \$19.99
- Guaranteed Legendary hero: \$49.99 (once per month)

7. ACCOUNT LEVEL SYSTEM

7.1 Overview

Level Range: 1-100

Purpose: Feature unlocking, progression gating, long-term goals

7.2 Experience Requirements

Formula:

$$\text{EXP_Required}(\text{level}) = 100 \times \text{level}^{1.5}$$

Examples:

Level 1→2: 100 EXP

Level 10→11: 1,581 EXP

Level 50→51: 25,000 EXP

Level 99→100: 122,474 EXP

Total EXP (1→100): ~4,500,000 EXP

7.3 Experience Sources

Combat:

- Campaign victory: 50 EXP (×1.5 Hard, ×2.0 Nightmare)
- PvP victory: 100 EXP
- Boss battle: 100 EXP

Progression:

- Hero level-up: 10 EXP per level
- Hero star promotion: 25/50/100/200 EXP (1★→2★ / 2★→3★ / 3★→4★ / 4★→5★)
- Hero unlock (first time): 10/25/50/100 EXP (Common/Rare/Epic/Legendary)

Equipment:

- Enhancement: 5 EXP per level
- Acquisition: 5/10/20/50 EXP (Common/Rare/Epic/Legendary)

Social:

- House donations: 10 EXP per 10K gold (capped at 100 EXP/day)
- Territory captured: 100 EXP (one-time)
- Triarchy formation: 200 EXP (one-time)

Daily:

- Login streak: 20-100 EXP (Day 1-7)
- Daily quests: 20/35/50 EXP per quest
- Weekly quests: 100/200/350 EXP

Gacha:

- Single summon: 5 EXP
- 10-pull: 60 EXP

7.4 Feature Unlocking

Level 1: Basic combat, hero roster, gacha, team selection

Level 5: Star promotion system

Level 10: Equipment system unlocked

Level 15: House browser, global chat

Level 20: Create/join Houses

Level 25: Territory map (view only)

Level 30: Territory claiming, Territory Wars

Level 35: Triarchy system

Level 40: Nightmare difficulty, elite bosses

Level 50: All features unlocked, seasonal rankings

7.5 Level-Up Rewards

Every Level (1-100):

Gold: $1,000 \times \text{level}$

Enhancement Stones: $10 \times \text{level}$

Summon Shards: $5 \times \text{level}$

Milestone Levels (10, 20, 30, 40, 50, 60, 70, 80, 90, 100):

- Equipment (Rare → Legendary progression)
- Hero shards or full heroes
- Titles (cosmetic)
- Large gold bonuses
- Portrait frames (cosmetic)

Level 100 Reward:

- 1 Mythic Hero (exclusive, cannot be obtained elsewhere)
- 1,000,000 Enhancement Stones
- 50,000,000 Gold
- "Immortal" permanent title
- Exclusive animated portrait frame

7.6 Account Power

Power Formula:

Hero_Power =

$(\text{Effective_HP} \times 0.5) +$

$(\text{Effective_ATK} \times 2.0) +$

$(\text{Effective_DEF} \times 1.0) +$

$(\text{Effective_SPD} \times 10.0) +$

$(\text{Effective_CRIT} \times 50.0) +$

$(\text{Effective_RES} \times 50.0) +$

$(\text{Effective_ACC} \times 30.0) +$

$(\text{Effective_EVA} \times 30.0)$

Account_Power = Sum of all owned hero powers

Typical Progression:

Level 10: ~50K power

Level 20: ~200K power

Level 30: ~800K power

Level 50: ~5M power

Level 100: ~50M+ power

8. SOCIAL SYSTEMS

8.1 Server Structure

Server Capacity: 500 players

Max Houses per Server: 20

Max Triarchies per Server: 6 (18 Houses in Triarchies, 2-5 independent Houses)

Auto-Assignment:

- New players assigned to first non-full server
- Players can browse and switch servers (7-day cooldown)

8.2 Houses (Guilds)

8.2.1 House Creation

Requirements:

- Account Level 20+
- 100,000 Gold
- Choose tribal affiliation (1 of 11 tribes)
- Choose House name from tribal list (6-8 names per tribe)

House Names by Tribe:

Undead (6 names):

- House Mortis
- House Gravesend
- House Necros
- House Shadowveil
- House Bonewright
- House Darkhollow

Infernal (6 names):

- House Hellscorn
- House Pyraxia
- House Dreadflame
- House Infernum
- House Ashenfang
- House Brimstone

Angelic (6 names):

- House Lightbringer
- House Dawnshield
- House Celestia
- House Radiance
- House Seraphim
- House Holywing

Gaia (7 names):

- House Thornroot
- House Wildgrowth
- House Greenleaf
- House Stoneoak
- House Earthshaper
- House Verdant
- House Rootclaw

Aquatic (6 names):

- House Tidecaller
- House Deepcurrent
- House Seafoam
- House Wavecrest
- House Coralkeep
- House Abyssal

Futuristic (7 names):

- House Nexus
- House Cyberstorm
- House Quantum
- House Nanoforge
- House Voidtech
- House Chronos

- House Synthetica

Egyptian (8 names):

- House Anubis
- House Osiris
- House Ra
- House Scarab
- House Pyramid
- House Sphinx
- House Sandstorm
- House Pharaoh

Norse (8 names):

- House Frostborn
- House Valhalla
- House Ragnor
- House Thunderclan
- House Icewind
- House Vikingblood
- House Frostfang
- House Wintershield

Draconic (8 names):

- House Dragonfire
- House Wyrmlaw
- House Scalelord
- House Flamewing
- House Drakeborn
- House Fireheart
- House Dragonfang
- House Wyvernhold

Shadow (7 names):

- House Nightfall
- House Voidwalker
- House Darkshroud
- House Shadowfang
- House Obsidian
- House Nocturne
- House Eclipse

Fae (7 names):

- House Moonpetal
- House Starwhisper
- House Glimmerleaf
- House Dreamweaver
- House Faewood
- House Enchanted
- House Twilightgrove

Total Unique House Names: 80

8.2.2 House Membership

Max Members: 30

Roles: Head (leader), Hand (officer), Sworn Sword (veteran), Retainer (member)

Joining:

- Browse House list (filtered by tribe, member count, level)
- Apply to join
- Head/Hand approves or rejects
- Instant join if House is public

Leaving:

- Members can leave anytime
- 7-day cooldown before joining another House
- Lose 50% of weekly contribution (lifetime contribution persists)

Kicking:

- Head/Hand can remove members
- Cannot kick if member is Head (must transfer leadership first)

8.2.3 House Leveling

Level Range: 1-50

EXP Sources:

- Gold donations: 1 EXP per 1,000 gold donated
- Enhancement Stone donations: 10 EXP per stone donated

EXP Requirements:

$\text{EXP_to_Next_Level} = 1,000 \times \text{level}$

Total EXP (1→50): 1,225,000 EXP

Bonuses per Level:

Level 10: +5% gold from battles for all members

Level 20: +10% EXP from battles

Level 30: +5% stat bonus to all heroes

Level 40: +10% shard drop rate

Level 50: +10% all bonuses (max)

8.2.4 Contribution System

Contribution Points:

- Earned by donating gold/stones to House vault
- Tracked weekly and lifetime

Weekly Leaderboard:

- Top 10 contributors displayed
- Resets every Sunday at midnight

Rewards:

- Rank 1: Special title, bonus rewards
- Rank 2-3: Medium rewards
- Rank 4-10: Small rewards

8.3 Triarchies (3-House Alliances)

8.3.1 Triarchy Formation

Requirements:

- 3 Houses on same server
- Each House: 20+ members, Level 15+
- 70% of each House's members vote "yes"
- Not currently in another Triarchy

Formation Process:

66. 1. One House Head proposes Triarchy (names 2 other Houses)
67. 2. All 3 Heads enter Triumvirate chat to negotiate

- 68. 3. Voting period (7 days)
- 69. 4. If all 3 Houses reach 70% approval, Triarchy forms
- 70. 5. Triarchy name auto-assigned from database (165 unique names)

8.3.2 Triarchy Names

165 Total Names based on tribal combinations.

Lookup Formula:

- Sort the 3 tribes alphabetically
- Format: "{tribe1}/{tribe2}/{tribe3}"
- Return corresponding name from database

Examples:

"angelic/infernal/undead" → "The Triarchy of Eternal Conflict"

"aquatic/fae/gaia" → "The Triarchy of the Primal Unity"

"draconic/futuristic/norse" → "The Triarchy of Stormforged Steel"

"egyptian/shadow/undead" → "The Triarchy of the Black Pyramid"

Full database: 165 unique names covering all possible 3-tribe combinations.

8.3.3 Triarchy Bonuses

5 Bonus Categories based on tribal composition:

Dark Triarchies (Undead/Infernal/Shadow dominant):

- +10% damage to Angelic/Gaia enemies
- +5% lifesteal
- Bonus: Dark Ritual ability (once per Territory War)

Holy Triarchies (Angelic/Egyptian/Fae dominant):

- +10% healing effectiveness
- +5% M.RES
- Bonus: Divine Intervention ability (revive fallen hero once per war)

Nature Triarchies (Gaia/Aquatic/Fae dominant):

- +10% HP regeneration
- +5% evasion
- Bonus: Nature's Blessing (cleanse all debuffs once per war)

Tech/War Triarchies (Futuristic/Norse/Draconic dominant):

- +10% ATK
- +5% CRIT
- Bonus: Tactical Strike (double damage on next attack once per war)

Balanced Triarchies (no dominant type):

- +5% all stats
- No special ability
- Bonus: Flexibility (can adapt bonuses mid-season)

8.3.4 Triumvirate Leadership

Triumvirate: The 3 House Heads

Powers:

- Declare war on other Triarchies
- Propose peace treaties
- Allocate territory rewards
- Invite 4th House to replace departing member
- Dissolve Triarchy (requires 2 of 3 Heads)

Triumvirate Chat: Private channel for 3 Heads only

8.3.5 Triarchy Dissolution

Voluntary:

- 2 of 3 Heads vote to dissolve
- All members notified, 7-day grace period
- Houses return to independent status

Forced:

- Any House drops below 15 members
- Season ends (automatic at Day 90)
- Server merge/closure

9. TERRITORY CONTROL

9.1 Territory Map

Total Territories per Server: 50

Territory Types:

Minor (15 territories):

- NPC defenders (Easy)
- Rewards: 10K gold/day
- Conquest cost: 50K gold

Major (20 territories):

- NPC defenders (Medium)
- Rewards: 50K gold/day
- Conquest cost: 100K gold

Great (10 territories):

- NPC defenders (Hard)
- Rewards: 200K gold/day
- Conquest cost: 300K gold

Capital (5 territories):

- NPC defenders (Very Hard)
- Rewards: 500K gold/day + exclusive legendary hero shards
- Conquest cost: 1M gold

9.2 Territory Claiming

Requirements:

- House Level 10+
- Account Level 30+ (for attacker)
- Gold from House Vault (covers conquest cost)

Claiming Process:

71. 1. Select unclaimed territory on map
72. 2. Confirm gold expenditure from House Vault
73. 3. Battle NPC defenders (5-hero defense team)
74. 4. Victory = claim territory
75. 5. 7-day hold period before full ownership

Defense Setup:

- House Head sets 5-hero defense team
- Defense team visible to attackers
- Can change defense once per 24 hours

9.3 Territory Conquest

Attacking Claimed Territory:

- Attack limit: 3 attacks per 24 hours (10 during Territory Wars)
- Each attack: Player's 5 heroes vs Territory's 5-hero defense
- Track wins/losses

Conquest Condition:

- 3 successful attacks within 24 hours = territory conquered
- Original owner loses territory
- Attacker's House gains territory
- 7-day hold period resets

Loss Condition:

- 3 failed attacks = locked out for 24 hours

9.4 Territory Wars (Weekend Event)

Schedule: Every Saturday-Sunday

Duration: 48 hours

Changes during event:

- Attack limit increased to 10 per 24 hours
- Defense wins grant bonus rewards
- Leaderboard tracks territory captures
- Double rewards for held territories

Scoring:

Minor capture: 10 points

Major capture: 25 points

Great capture: 50 points

Capital capture: 100 points

Successful defense: 5 points per attack repelled

Rewards:

Top House:

- 1M gold
- 10K Enhancement Stones
- Exclusive title ("Territory Conqueror")

Top 3 Houses:

- 500K gold
- 5K stones

Top 10 Houses:

- 250K gold
- 2.5K stones

10. SEASONAL POLITICS

10.1 Season Structure

Season Length: 90 days (3 months)

Off-Season: 7 days between seasons

Season Timeline:

Week 1 (Days 1-7): "The Dissolution"

- Previous season ends at midnight server time
- All Triarchies automatically dissolve
- Territory control resets to unclaimed
- Season rewards calculated and distributed
- New season begins

Week 2-3 (Days 8-21): "The Reformation"

- Houses can propose new Triarchies
- Diplomatic negotiations
- Voting period for Triarchy formations
- Max 6 Triarchies can form (18 Houses)
- Remaining 2-5 Houses stay independent

Week 4-11 (Days 22-77): "The Great Game"

- Territory claiming and wars
- Triarchy competitions

- Regular Territory Wars every weekend
- Power struggles, alliances, betrayals

Week 12 (Days 78-90): "The Reckoning"

- Final Tournament event (server-wide)
- Last Territory War (double rewards)
- Rankings freeze on Day 90 at midnight
- Final push for top positions

Off-Season (7 days):

- No Territory Wars
- No Triarchy formation/dissolution
- Territory control frozen
- Casual play, planning for next season
- Teasers for next season rewards

10.2 Season Rewards

Calculated based on:

- House rank (by total power)
- Triarchy rank (by territory held + war wins)
- Individual contribution to House
- Territories held at season end

House Rewards:

Rank 1 House:

- 5,000,000 Gold
- 50,000 Enhancement Stones
- 1 Exclusive Legendary Hero (unique to Season)
- Permanent title: "[Season X] Champions"
- Hall of Fame entry

Rank 2-3 Houses:

- 2,000,000 Gold
- 20,000 Stones
- Legendary Hero shards

Rank 4-10 Houses:

- 1,000,000 Gold
- 10,000 Stones

Individual Rewards:

Top Contributor per House:

- 1,000,000 Gold
- 10,000 Stones
- "Top Contributor" title

Participation Rewards (all members):

- Season badge
- 100,000 Gold
- 1,000 Stones
- 500 Summon Shards

10.3 Season Reset Mechanics

What Resets:

- All Triarchies dissolve
- All territories return to unclaimed
- Weekly contribution scores (lifetime persists)
- Territory War rankings
- Diplomatic treaties/wars

What Persists:

- House membership
- House level and vault
- Player progression (heroes, equipment, account level)
- Lifetime contribution scores
- House reputation/fame score
- Season history and achievements

10.4 Hall of Fame

Archived per Season:

- Champion House name and members
- Champion Triarchy composition
- Top contributor
- Total territories captured
- Largest battle (most players involved)
- Notable events (major betrayals, upsets)

Viewable by all players in Hall of Fame screen.

11. CHAT INFRASTRUCTURE

11.1 Chat Channels (6 Total)

1. Global Chat

- Scope: All 500 players on server
- Rate limit: 200 messages/hour server-wide
- Use: General discussion, server announcements

2. House Chat

- Scope: All members of same House (max 30)
- Rate limit: Unlimited
- Use: House coordination, casual chat

3. Officer Chat

- Scope: Head + Hands only (2-4 people)
- Rate limit: Unlimited
- Use: Leadership decisions, strategy

4. Triarchy Chat

- Scope: All members of 3 allied Houses (max 90)
- Rate limit: 500 messages/hour
- Use: Alliance coordination, war planning

5. Triumvirate Chat

- Scope: 3 House Heads only
- Rate limit: Unlimited
- Use: High-level diplomacy, major decisions

6. Whispers (DMs)

- Scope: 1-on-1 private messages
- Rate limit: 100 messages/hour per conversation
- Use: Private discussions

11.2 Chat Features

Rich Content:

- Hero linking (tap to view hero details)
- Equipment linking (tap to view item stats)
- @mentions (notify specific user)
- Reply threading (reply to specific message)

Moderation:

- Automated profanity filter
- Spam detection (identical messages, rapid posting)
- Officer mute powers (24-hour max)
- Report system (flags for admin review)

Message History:

- 500 messages stored per channel
- Load more on scroll up
- Search function (keyword search)

11.3 Real-Time Delivery

Technology: Firebase Realtime Database listeners

Latency: <1 second message delivery

Scalability: Supports 500 concurrent users per server

12. MONETIZATION

12.1 Revenue Streams

Gacha Summons (60% of revenue):

- Summon shard packs (\$9.99 - \$99.99)
- Guaranteed hero packs (\$19.99 - \$49.99)
- Daily deals, limited offers

Battle Passes (20% of revenue):

- Season Pass (\$9.99/month or \$24.99/3-month season)
- Premium rewards track
- Exclusive cosmetics
- Resource boosters

Cosmetics (15% of revenue):

- Hero skins (alternative visuals)
- Portrait frames
- House banners
- Chat emotes/stickers
- Victory animations

Convenience (5% of revenue):

- Auto-battle speed boost (2× speed)
- Instant equipment enhancement
- Extra team slots
- Resource packs (gold, stones)

12.2 Pricing Strategy

Gacha Packs:

1,000 shards: \$9.99

3,000 shards: \$24.99 (16% bonus)

10,000 shards: \$99.99 (67% bonus)

Battle Pass:

Monthly: \$9.99

Seasonal (3 months): \$24.99 (17% discount)

Cosmetics:

Hero Skin: \$4.99 - \$9.99

Portrait Frame: \$2.99

House Banner: \$4.99

Chat Pack: \$1.99

12.3 Non-Monetized Features

NO Pay-to-Win:

- Cannot buy direct stat boosts
- Cannot buy guaranteed victories
- Cannot buy exclusive powerful heroes (legendaries available F2P)

Free-to-Play Viable:

- All content accessible F2P
- Pity system guarantees legendaries over time

- Daily/weekly rewards provide summon shards
- Grinding can match spending (takes longer)

13. UI/UX DESIGN

13.1 Main Hub

Layout: Isometric fortress view with 8 interactive buildings

Buildings:

- 76. 1. War Table → Campaign/PvE battles
- 77. 2. Arena → PvP battles (unlocks Level 10)
- 78. 3. Summoning Altar → Gacha summons
- 79. 4. Forge → Equipment enhancement (unlocks Level 10)
- 80. 5. Vault → Inventory (heroes + equipment)
- 81. 6. House Commons → House browser/join
- 82. 7. Citadel → Triarchy management (unlocks Level 35)
- 83. 8. Background → Decorative, no interaction

Interaction:

- Hover: Building glows, name appears
- Click: Navigate to corresponding screen
- Locked: Greyed out, shows "Unlock at Level X"

13.2 Core Screens

Battle Preparation

- Team selection (drag 5 heroes from roster)
- Enemy preview (NPC team shown)
- Start button
- Auto-battle toggle

Battle Scene

- 1152×648 resolution
- 5 heroes on left (player), 5 on right (enemy)
- HP bars above each hero
- Energy bars below HP
- Turn indicator (flashing outline)
- Ability buttons (bottom center)
- Victory/defeat overlay at end

Gacha Scene

- Chest visual (animated idle)
- Summon button (100 shards) or 10× button (1,000 shards)
- Shard count display (top corner)
- Results: Hero card reveal animation
- Continue button after result

Hero Roster

- Grid layout (4 columns)
- Hero cards (120×160 each): Portrait, name, stars, level
- Locked cards (silhouette, "Not Unlocked")
- Filter/sort buttons (top): Tribe, rarity, level
- Click hero → Hero detail panel

Hero Detail Panel

- Full portrait (large)
- Stats display (HP, ATK, DEF, SPD, CRIT, M.RES, ACC, EVA)
- Ability descriptions (icons + text)
- Equipment slots (4): Current equipped or empty
- Level-up button (if EXP available)
- Promote button (if shards available)

Equipment Screen

- Inventory list (all owned equipment)
- Filter by type (weapon, armor, accessory)
- Sort by rarity, stats
- Click item → Detail panel: Stats, equipped on whom, enhance button
- Enhance interface: Current level, next level stats, cost, confirm button

House Hall Screen

- House name, tribe emblem, level, member count
- Member list: Name, rank, power, contribution
- Chat window (House chat)
- Donate button (gold/stones)
- Settings (Head/Hand only): Edit info, manage members, disband

Triarchy Screen

- Triarchy name, 3 House emblems
- Territory map (visual map of server territories)
- War status (active wars, treaties)
- Triarchy chat

- Triumvirate actions (Head only): Declare war, propose peace

Territory Map

- Isometric or top-down map of 50 territories
- Color-coded by owner (unclaimed, your House, allied Houses, enemy Houses)
- Click territory → Details: Type, rewards, defender team, attack button
- Leaderboard (top Houses by territory count)

13.3 Mobile UX Considerations

Thumb-Friendly:

- Important buttons in bottom half of screen
- No tiny tap targets (minimum 44×44 pixels)

Clear Hierarchy:

- Primary actions: Large, bright, centered
- Secondary actions: Smaller, side/bottom
- Destructive actions: Red, confirmation required

Feedback:

- Button press: Visual scale/glow
- Success: Green flash + sound
- Error: Red shake + error message
- Loading: Spinner or progress bar

Notifications:

- Badge counters (red dot) on hub buildings
- Push notifications for: Energy full, Territory War starts, House events

14. ART REQUIREMENTS

14.1 Scope

Launch (66 Heroes):

- 66 hero portraits (512×512 each)
- 66 hero battle sprite sets (5 animations each)
- UI assets (buttons, panels, icons)
- Main hub background + 8 building cutouts
- Gacha reveal animations + VFX

Post-Launch (66 Heroes):

- Additional 66 hero portraits
- Additional 66 sprite sets
- New cosmetics (skins, frames)

14.2 Character Art (Per Hero)

Portrait

- Size: 512×512 pixels
- Style: Semi-realistic stylized fantasy
- Quality: Hero Wars / AFK Arena level
- Framing: Bust or half-body shot
- Format: PNG with transparency + PSD source file
- Use: Gacha reveal, hero roster, detail panel, chat linking

Battle Sprite Set

- Character Sprite: ~256-512px tall (varies by hero size)
- 5 Animations Required:
 1. Idle: Looping (2-4 seconds), breathing/subtle movement
 2. Attack: 1-2 seconds, attack motion + recovery
 3. Ability: 1-2 seconds, special move casting
 4. Hurt: 0.5-1 second, hit reaction (flinch/stagger)
 5. Death: 1-2 seconds, fall/disappear animation
- Format: Sprite sheet or individual frames, PNG with transparency
- Frame Rate: 8-12 FPS recommended
- Use: Battle scene

Estimated Work per Hero:

- Portrait: 4-8 hours
- Battle sprites: 8-12 hours
- Total: 12-20 hours per hero

14.3 VFX/Spell Effects

Ability VFX (~200 unique effects):

- Fire magic (fireball, flame breath, explosion)
- Ice magic (freeze, ice shard, blizzard)
- Lightning (lightning bolt, chain lightning, storm)
- Healing (green glow, sparkles, aura)

- Dark magic (shadow bolt, death coil, curse)
- Holy magic (divine light, blessing, smite)
- Nature magic (vines, roots, earthquake)
- Tech effects (laser, plasma, hologram)

UI VFX:

- Gacha chest opening (flash, particles)
- Hero reveal (rarity glow, star appearance)
- Level-up burst (golden light)
- Star promotion (star expansion animation)
- Critical hit indicator (red flash)
- Screen transitions (fade, wipe)

Battle VFX:

- Hit impacts (slash, punch, magic hit)
- Damage numbers (floating text, color-coded)
- Status effects (burn icon, freeze icon, stun icon)
- Victory confetti / defeat dimming

14.4 UI Assets

Buttons:

- Primary (large, gold-trimmed)
- Secondary (medium, gray)
- Destructive (red, warning)
- States: Normal, hover, pressed, disabled

Panels:

- Dark semi-transparent backgrounds
- Gold trim accents
- Consistent border style

Icons:

- Resource icons (gold, shards, stones)
- Stat icons (HP, ATK, DEF, SPD, etc.)
- Equipment icons (weapon, armor, accessory)
- Tribe emblems (11 unique)

Frames:

- Hero card frames (rarity-colored borders)
- Portrait frames (cosmetic unlocks)

- Equipment slot frames

14.5 Art Style Reference

Target Aesthetic: Semi-realistic stylized fantasy

Visual References:

- Hero Wars (visual quality benchmark)
- AFK Arena (character design approach)
- Mobile Legends (polish level)

NOT Like:

- Raid: Shadow Legends (too realistic/dark)
- Idle Heroes (too cartoony/simple)
- Pixel art games (wrong style)

Color Palette:

- Dark fantasy tones (deep purples, blacks, golds)
- Vibrant accents for abilities (bright reds, blues, greens)
- UI: Dark navy/black backgrounds, gold highlights

14.6 Art Pipeline

Character Artist Deliverables:

84. 1. Rough sketch (approval checkpoint)
85. 2. Line art (approval checkpoint)
86. 3. Color flats
87. 4. Final rendering + lighting
88. 5. Sprite poses (5 key frames per animation)
89. 6. Final sprite sheet + individual PNGs
90. 7. PSD source files

VFX Artist Deliverables:

91. 1. Ability effect concepts (approval checkpoint)
92. 2. Frame-by-frame animation
93. 3. Final sprite sheets
94. 4. Particle textures (if using particle system)

UI Artist Deliverables:

95. 1. Style guide (fonts, colors, button styles)
96. 2. All buttons (multiple states)
97. 3. Panel templates
98. 4. Icon set

99. 5. Main hub composition

15. TECHNICAL ARCHITECTURE

15.1 Technology Stack

Game Engine: Godot 4.x

Programming Language: GDScript

Backend: Firebase (Realtime Database + Cloud Functions)

Platform Build: Export to iOS/Android via Godot mobile export

15.2 Core Systems (Implemented)

BattleState.gd:

- Turn-based combat state machine
- Damage calculation
- Energy management
- Status effects
- Win/loss detection

HeroDatabase.gd:

- Loads hero_database.json (132 heroes)
- create_hero() factory method
- get_hero_entry() lookup

HeroData.gd:

- Hero stats (base + effective)
- calculate_effective_stats()
- Leveling, star promotion
- Equipment slots

EquipmentDatabase.gd:

- Random equipment generation
- Rarity-based stat ranges
- create_random_equipment()

EquipmentData.gd:

- Equipment stats
- Enhancement system

- `get_effective_bonuses()`

PlayerData.gd (Autoload):

- `owned_heroes` dictionary
- `equipment_inventory`
- `selected_team` array
- `summon_shards`
- `player_name`, `server_id`, `house_id`
- `serialize()` / `deserialize()`
- `save_to_cloud()` with `debounce`

CloudManager.gd (Autoload):

- Firebase integration
- `save_player_data()`
- `load_player_data()`
- Real-time listeners

GachaSystem.gd:

- Rarity roll (70/20/9/1)
- Pity system (10-pull Epic, 100-pull Legendary)
- Duplicate → shard conversion
- Auto-promotion

AbilityDatabase.gd:

- Generic abilities (12 shared)
- Epic abilities (99 unique)
- Ability execution logic

EpicAbilities.gd:

- Defines all 99 unique Epic abilities
- `execute()` method per ability

15.3 Planned Systems (Not Yet Implemented)

AccountLevelData.gd:

- `account_level`, `account_exp`, `account_power`
- `add_account_exp()`
- `calculate_account_power()`
- `can_access_feature()`

ServerManager.gd:

- Server assignment
- Server switching (7-day cooldown)
- Server data structure

HouseManager.gd:

- House creation
- Membership (join, leave, kick)
- Donations (gold, stones)
- House leveling
- Vault management

TriarchyManager.gd:

- Triarchy formation (voting, approval)
- Name assignment from 165-name database
- Bonus calculation
- Dissolution

TerritoryManager.gd:

- Territory map data
- Claiming (vs NPC defenders)
- Conquest (vs player defenders)
- Rewards distribution

SeasonManager.gd:

- Season cycle (90 days)
- Week transitions
- Dissolution, reformation, reckoning
- Rewards calculation
- Hall of Fame archiving

ChatManager.gd:

- 6 channel types
- Message sending/receiving
- Real-time Firebase listeners
- Rate limiting
- Moderation (profanity filter, spam detection)

15.4 Firebase Schema

User Data:

/users/{userId}/

player_data:

account_level: int

account_exp: int

account_power: int

summon_shards: int

player_name: string

server_id: string

house_id: string

owned_heroes: {hero_id: {level, star, shards, exp, equipment}}

equipment_inventory: {equip_id: {stats, rarity, type, level}}

selected_team: [hero_id, ...]

Server Data:

/servers/{serverId}/

player_count: int

houses: {house_id: {name, tribe, level, members: [user_id, ...]}}

triarchies: {triarchy_id: {name, house_ids: [h1, h2, h3], bonuses}}

territories: {territory_id: {owner_house_id, defenders: [hero_id, ...]}}

season:

current_season: int

day: int (1-90)

phase: string ("dissolution", "reformation", "great_game", "reckoning")

Chat Data:

/chat/{serverId}/

global: {message_id: {user_id, message, timestamp}}

houses/{house_id}: {message_id: {user_id, message, timestamp}}

triarchies/{triarchy_id}: {message_id: {user_id, message, timestamp}}

whispers/{user1_user2}: {message_id: {from, to, message, timestamp}}

15.5 Cloud Functions (Server-Side Logic)

validateHouseCreation():

- Check player level ≥ 20
- Check gold $\geq 100K$
- Check server has <20 Houses
- Deduct gold, create House entry

validateTriarchyFormation():

- Check all 3 Houses meet requirements
- Check vote percentages
- Assign Triarchy name from database
- Update House entries

validateTerritoryAttack():

- Check attack limit not exceeded
- Simulate battle (attacker team vs defenders)
- Update win/loss count
- Trigger conquest if 3 wins in 24h

calculateSeasonRewards():

- Rank all Houses by power/territories
- Distribute gold, stones, heroes
- Archive season to hall_of_fame
- Reset territory map

Anti-Cheat Validation:

- All critical operations server-side
- Cannot modify gold/shards client-side
- Rate limiting (attacks, house creation, etc.)

16. LAUNCH SCOPE

16.1 Full Vision vs Launch

Full Vision (132 Heroes):

- All 11 tribes fully represented
- 12 heroes per tribe
- Complete roster for endgame

Launch Scope (66 Heroes):

- All 11 tribes represented (6 heroes each)
- Faster to market (4-5 months art production vs 9-12 months)
- Lower risk (\$79K art vs \$158K)
- Built-in content pipeline (66 heroes as post-launch updates)

Distribution at Launch:

Tier 1 Tribes (Undead, Infernal, Angelic, Draconic):

1 Common, 1 Rare, 3 Epic, 1 Legendary = 6 heroes $\times$ 4 = 24 heroes

Tier 2 Tribes (Egyptian, Norse, Futuristic, Gaia, Aquatic, Fae, Shadow):

2 Common, 2 Rare, 1 Epic, 1 Legendary = 6 heroes $\times$ 7 = 42 heroes

Total: 66 heroes

Rarity breakdown: 18 Common, 18 Rare, 19 Epic, 11 Legendary

16.2 MVP Features (Launch Day)

Core Systems:

- ☒ Hero collection (66 heroes)
- ☒ Combat system (auto-battle + manual abilities)
- ☒ Gacha summoning (pity system)
- ☒ Equipment (4 slots, enhancement to +15)
- ☒ Account leveling (1-100)
- ☒ Campaign battles (Normal, Hard, Nightmare)

Social Systems:

- ☒ Houses (create, join, donate, chat)
- ☒ Triarchies (formation, bonuses, chat)
- ☒ Territory map (50 territories, claiming)

-  Global chat

Monetization:

-  Gacha packs (\$9.99-\$99.99)
-  Battle pass (Season 1)

16.3 Post-Launch Roadmap

Month 1-3 (Season 1):

- 66 heroes at launch
- Houses + Triarchies functional
- Territory Wars every weekend
- First season cycle (90 days)

Month 4-6 (Season 2):

- Add 20 new heroes (expand rosters to 8 per tribe)
- New cosmetics (hero skins, portrait frames)
- Balance patches based on data

Month 7-9 (Season 3):

- Add 20 more heroes (expand to 10 per tribe)
- PvP Arena (ranked battles)
- Guild vs Guild events

Month 10-12 (Season 4):

- Final 26 heroes (complete 132-hero roster)
- Major expansion: New game mode
- Celebrate 1-year anniversary

16.4 Success Metrics

Launch Targets (Month 1):

- 10,000 downloads
- 2,000 DAU
- 3% payer conversion
- \$30K revenue

Year 1 Targets:

- 100,000 downloads
- 10,000 DAU
- 4% payer conversion

- \$1M ARR

Year 3 Targets:

- 1,000,000 downloads
- 150,000 DAU
- 5% payer conversion
- \$27M ARR

- 154. 1. Nyrathis (Legendary Assassin) - Void queen
- 155. 2. Nightfall (Epic Mage) - Shadow sorcerer
- 156. 3. Darkshroud (Rare Assassin) - Shadow assassin
- 157. 4. Voidwalker (Rare Warrior) - Void knight
- 158. 5. Shadeling (Common Assassin) - Shadow imp
- 159. 6. Duskblade (Common Warrior) - Dark warrior

Fae (6 heroes)

- 160. 1. Pucklyn (Legendary Mage) - Fae trickster
- 161. 2. Moonpetal (Epic Support) - Fairy queen
- 162. 3. Glimmerleaf (Rare Mage) - Nature sprite
- 163. 4. Starwhisper (Rare Assassin) - Fae rogue
- 164. 5. Dewdrop (Common Support) - Lesser fairy
- 165. 6. Thornprick (Common Assassin) - Pixie rogue

Total: 66 heroes (18 Common, 18 Rare, 19 Epic, 11 Legendary)

APPENDIX C: KEY FORMULAS

Level Multiplier:

$$\text{Level_Mult} = 1 + (\text{current_level} - 1) \times 0.05$$

Star Multiplier:

1★: 1.0×

2★: 1.2×

3★: 1.5×

4★: 1.9×

5★: 2.4×

Effective Stats:

$$\text{Effective_HP} = \text{Base_HP} \times \text{Level_Mult} \times \text{Star_Mult} \times (1 + \text{Equipment_Bonus})$$

$$\text{Effective_ATK} = \text{Base_ATK} \times \text{Level_Mult} \times \text{Star_Mult} \times (1 + \text{Equipment_Bonus})$$

$$\text{Effective_DEF} = \text{Base_DEF} \times \text{Level_Mult} \times \text{Star_Mult} \times (1 + \text{Equipment_Bonus})$$

$$\text{Effective_SPD} = \text{Base_SPD} + (\text{Level_Mult} \times \text{Star_Mult} \times \text{Equipment_Bonus})$$

Auto-Attack Damage:

$\text{Base_Damage} = \text{Attacker_ATK} - (\text{Defender_DEF} \times 0.5)$

$\text{Final_Damage} = \text{floor}(\text{Base_Damage} \times \text{random}(0.9, 1.1) \times \text{Crit_Mult})$

Magic Damage:

$\text{Base_Damage} = \text{Caster_ATK} \times \text{Ability_Multiplier}$

$\text{Final_Damage} = \text{floor}(\text{Base_Damage} \times (1 - \text{Defender_M.RES} / 100))$

EXP to Level (Hero):

$\text{EXP_Required} = 100 \times \text{current_level}$

EXP to Level (Account):

$\text{EXP_Required} = 100 \times \text{level}^{1.5}$

Hero Power:

Hero_Power =

$(\text{Effective_HP} \times 0.5) +$

$(\text{Effective_ATK} \times 2.0) +$

$(\text{Effective_DEF} \times 1.0) +$

$(\text{Effective_SPD} \times 10.0) +$

$(\text{Effective_CRIT} \times 50.0) +$

$(\text{Effective_RES} \times 50.0) +$

$(\text{Effective_ACC} \times 30.0) +$

$(\text{Effective_EVA} \times 30.0)$

DOCUMENT END

This GDD represents the complete design vision for Triarchy: Houses of Mythos as of February 2026.

Current Implementation Status: Core systems (combat, heroes, equipment, gacha) are fully implemented and working. Social systems (Houses, Triarchies, Territories, Seasons, Chat) are designed but not yet implemented.

Launch Scope: 66 heroes, all 11 tribes, core combat + gacha + equipment, Houses + Triarchies, Territory Wars.

Post-Launch: Remaining 66 heroes released as ongoing content over Year 1.

For questions or clarifications, contact: Michael A. Melendez
